#### **G KEY SUCCESS FACTORS**

The following factors are pivotal to the successful implementation of the strategic plan.

# Clarity and consistency of roles, responsibilities and approaches of the Commission

It is important to ensure that the roles and responsibilities of staff members and Commissioners are clear and consitent to avoid conflict and confusion. Furthermore approaches adopted by the NYC to its work must be consistent although allowing flexibility of reviewing what is not working effectively.

## Strong relationships with Provincial Youth Commissions

The relationship with PYCs is critical in ensuring coordination and integration of programmes. It is important to ensure that mechanisms established for coordination, engagement and collaboration are seen to be mutually beneficial for both the NYC and the PYCs.

### Organisational culture

To ensure that the NYC remains efficient and effective in its work, it is highly important to instil a strong sense of work ethic, dedication, leadership, decisiveness and transparency.

#### Governance mechanisms

The Commission should provide leadership through adoption of effective governance mechanisms which would ensure achievement of political oversight responsibilities and guiding the work of the Secretariat.

#### Sufficient capacity

There is a need for adequate capacity to support the implementation of the activities proposed. This includes suitable technical and conceptual skills amongst staff, effective organisational systems and procedures and adequate support resources.

# Alignment with the national agenda

The commission must ensure that its work continue to appeal to key stakeholders by aligning its programmes with priority issues in the national agenda and continuing to explore mechanisms through which resources can be mobilised to achieve the stated objectives beyond what is immediately available through state machinery.
